

TENA Wash Mousse

TENA *Wash Mousse* is a 3 in 1 product that gently cleanses, restores and protects even the most delicate and fragile skin. Ideal for frequent cleansing, TENA *Wash Mousse* is the perfect replacement for soap and water, as well as skin conditioning products. TENA *Wash Mousse* has moisturising and protection properties and can be left on the skin without rinsing reducing the time needed for personal skincare by up to 80%*.

Specification

Physical state: Aerosol foam that forms a liquid cream, oil-in-water emulsion
Smell: Fresh, light fragrance
Solubility: Fully mixable in water
pH: 5.5

Safety

The product formulation, production, safety evaluation and documentation comply with the EU Cosmetic Directive (76/768/EEC). Production conforms to GMP and ISO 9001-2000. The product has been evaluated with epicutaneous testing under dermatological control, and has a long history of safe use. As stipulated in the 7th Amendment of the EU Cosmetic Directive, the product has not been tested on animals.

TENA Wash Mousse

What it is

TENA Wash Mousse is a mild emulsion foam designed to cleanse, restore and protect the skin. Documented in epicutaneous tests under dermatological control, the mousse has a 20-year history of safe and frequent usage on incontinent patients in numerous countries around the world.

What it does

TENA Wash Mousse cleanses patients without soap and water. It can be left on the skin without rinsing due to its moisturising and skin protection properties. At the same time, the cream does not run off the skin or interfere with the fluid acquisition and absorption of incontinence pads.

How to use it

Available in handy aerosols, simply spray a small amount of TENA Wash Mousse on to a disposable cloth like *Cellduk*, *Soft Wipe* or *Wash Glove* and wipe the intimate skin areas from front to back. No need to rinse with water. Wipe off any foam contaminated when applying the first layer. Subsequent layers can, however, be left on the skin.

Who should use it

Used by over 70,000 patients worldwide everyday, TENA Wash Mousse is intended for frequent cleansing of the intimate skin areas when changing incontinence pads, but can also be used for whole body cleansing.
