

ALCOHOL SURFACE DISINFECTANT WIPES

Perfect for water sensitive environments, these high alcohol wipes offer a broad spectrum efficacy across bacteria, yeast and viruses, providing fast cleaning and disinfection without leaving any chemical residue on surfaces.

3 products in this range.

AT A GLANCE:

- ✓ PHMB Free
- ✓ Quat Free
- ✓ Food Safe

IDEAL FOR:

- ✓ Non-porous hard surface disinfection
- ✓ Use within dry food processing and manufacturing

HOW TO USE:

STEP 1

RISK ASSESSMENT

Please follow your agreed risk assessment policy guidelines regarding the use of PPE.

STEP 2

WIPE SELECTION

Choose the dispenser type and dispense the wipe.

STEP 3

S-SHAPE TECHNIQUE

Wipe the surface in an S Shape moving from clean to dirty. Use the wipe flat not scrunched.

Do not go over the same area twice with the same wipe.

STEP 4

FRESH WIPE

Use a fresh wipe if your wipe becomes soiled or dry.

STEP 5

DISCARD

Discard used wipes in the appropriate waste bin following your local agreed guidelines.

Do not flush

STEP 6

LET DRY

Allow the surface to dry before use.

TECHNICAL DETAILS

”

PalHygiene's proprietary Tritex® material is made by bonding layers of spunbond and meltblown polypropylene fibres together in a high heat process. The addition of a hydrophilic coating means optimum and consistent liquid discharge.

CHEMICAL FORMULATION

Pal TX Alcohol Surface Disinfectant solution is formulated using ethanol. It is commonly used as a disinfectant for hands and surfaces and is non-corrosive to most surfaces. The ethanol solution has limited residual activity due to evaporation, which results in brief contact times and limited activity in the presence of organic material. Ethanol is most effective when combined with purified water to facilitate diffusion through the cell membrane. A mixture of 70% ethanol diluted in water is effective against a wide spectrum of microorganisms.

MATERIALS

Tritex® material is made by bonding layers of spunbond and meltblown polypropylene fibres together in a high heat process before a hydrophilic coating is applied. This material is 100% synthetic.

High Strength

The material offers high strength in both directions – across and along the wipe.

Excellent Solution Retention

Ensuring even wetness throughout the wipe.

Very Low Linting

Low risk of leaving contaminating fibres on surfaces.

Efficient Solution Release

Active wipe ingredients are transferred to the surface rather than being trapped in the wipe material fibres.

*does not apply to S76230TX in this product range.
