Exel[®] Revolution Microfibre Socket Mop

A heavy-duty and highly absorbent microfibre socket mop with the popular push-fit Exel[®] socket.

This Exel Revolution mop combines superior microfibre yarn with the Exel push-fit socket, making it one of the most absorbent mops on the market.

The mop can clean a larger floor area faster than traditional cotton mops, as it's made with a stayflat band, which holds the mop in a circular shape that increases contact with the floor.

In addition, the looped microfibre yarn prevents tangling and is low linting.

The mop can be machine washed multiple times, and is available with colour coded sockets and in two weights.

Key features & benefits

Microfibre cleaning

Highly absorbent

Faster cleaning

Machine washable

- A socket mop which benefits from microfibre technology.
- Highly absorbent and soft yarn.
- Cleans larger floor areas faster.
- Looped yarn prevents tangling enabling machine washing.

How it's used

To fit the mop head push the Exel handle into the socket. To remove Exel handle from the socket place mop on the floor with handle pointing away from your face, then position feet over mop. Keep handle pointing away from your face and pull upwards.
