RAMON BRAND LABEL

Ramon Product Codes:

740B.CT (Blue) 740G.CT (Green)
740R.CT (Pink) 740Y.CT (Yellow)

(S/stock/sales unit: per case)

Description:

10 Ramon “Contract” Microfibre Cloths.

Approximate Size:

Length: 40cm (15.7in)

Width: 40cm (15.7in)

Approximate Weight:

200g per square metre approx.

Colours:

blue, green, red or yellow

Construction:

Warp knitted loop pile fabric

Fabric Yarn:

72 filaments per thread

Blend of 80% polyester - 20% polyamide

Overlocking Yarn:

100% polyester – 19/22 stitches per 2.5cm

Retail Pack Dimensions:

240mm wide x 425mm deep

Retail Pack Weight:

320g

Labelling:

Care Instructions:

Machine wash at 90°C. After washing simply hang to dry.

Do not wash with a fabric conditioner and do not use bleach.

Safety Warning:

Please keep this wrapper away from babies and small children to avoid the risk of suffocation.

Primary Pack Bar Codes:

5011251 408205 (Blue)

5011251 408243 (Green)

5011251 408229 (Pink)

5011251 408267 (Yellow)

Outer Case Bar Codes:

05011251 408212 (Blue)

05011251 408250 (Green)

05011251 408236 (Pink)

05011251 408274 (Yellow)

Packaging:

All packaging is recyclable and meets with the Packaging (Essential Requirements) Regulations 2013.

Details for Producer Responsibility Obligations (Packaging Waste) Regulations 2007 are as follows:-

Primary Packaging:

10 cloths folded in half per self-seal plain polypropylene bag (size: 26 x 44cm – weight: 5.5g)

Printed cardboard label/insert

(size:150 x 150mm – weight: 6.4g)

Transit Packaging:

200 (20 packs of 10) per cardboard carton

(size: 41 x 41 x 32 cm)

Gross weight: 7.1kg approx.

Palletisation:

36 cases per standard 4-way pallet

(4 layers of 9 cases)

Overall pallet height: 1.82m

WHAT IS MICROFIBRE?

- Fibre becomes microfibre when it weighs less than 1g/10km of length.
- For most microfibres this equates to <0.12 denier. (Denier is a measure of linear density)
- The thickness of microfibre is finer than 1/100 of human hair.
- These microfibre cloths are made of 85% polyester and 15% polyamide bi-component fibre. It is split into 16 or 17 micro-segments by special physical and chemical treatments.

What are the Advantages of Microfibre?

- Microfibre cloths give quicker results and clean easier and more effectively than conventional cloths.
- The microfibre cloths leave the surface clean and smear free.
- There is no need to use chemicals as they clean with just water.
- The capillary action of the microscopic pores in the microfibre absorbs tremendous amounts of water with lightning speed.
- They are environmentally friendly.
- Microfibre is very durable. It outlasts most mops and cloths made from natural fibres.
- The cloths are extensively washable. They may be laundered up to 400 times at 90°C. When laundering the cloths only a standard detergent is required.
- No bleach or fabric softener should be used.
- Microfibre can remove up to 98% of bacteria from surfaces.

How Does Microfibre Work?

- Microfibre has more than 40 times of the surface area compared to normal fibre. The split-fibres have so many pin holes it makes the fibre extremely absorbent.
- The capillary action and surface expanding allows for strong cleaning ability.
- The wedge shaped fibre, together with core-polyamide, fits the surface tightly. This helps to attract and trap dust and dirt. It is also excellent for cleaning greasy surfaces without scratching them.
- Microfibre fine pores leave very little moisture behind. Any droplets remaining on the cleaning surface will evaporate quickly and leave a clean, smear-free surface.
- Microfibre grabs and holds dirt - regular fibres only push it around.
