

# ***Stainless Steel Spring Strap Glove***

GL06

**Self-adjusting tensioning system on wrist allows for easy fit.**

The Stainless steel gloves offer the ultimate in cut protection. The mesh gloves are made of corrosion resistant, stainless steel rings that are individually welded for maximum strength, flexibility and durability. Metal mesh gloves are hygienic and easily sanitised - the rings resist processing fats and oils and clean up simply with hot water and soap.

These gloves are easy to clean and disinfect and more suitable for meat processing, food industry, slaughterhouse, clothing cutting, leather processing, etc.
