Quick-Dry

The Quick-Dry technology is included in the acquisition patch directly below the top sheet in the centre of the pad. It quickly absorbs urine away from the skin and into the pad and prevents the urine returning to the surface. It can handle several gushes of urine without affecting how the pad works which results in exceptional skin dryness and leakage protection for the user.

pH Value

The core technology in the product helps to guarantee a low pH which is similar to the skin. This helps to protect the skin and ensures improved skin health.

Active Zone

The Active Zone is an area centred in the middle of the pad, which provides high absorption where it is really needed. This provides exceptional skin dryness and improved leakage protection for the user.

Natural Odour Protection

Natural Odour Protection reduces the risk of unpleasant smells.

Attends Slips are tested and approved by proDERM, Institute for Applied Dermatological Research (does not include Slip Regular Small 10).

These symbols are Trademarks of Attends.
