TECHNICAL SPECIFICATION

WASHROOM CLEANER/SANIFRESH

Highly fragranced, deep green liquid developed for use around washroom areas. This multi-purpose detergent can be used on any surface from sinks, floors, mirrors or toilets, leaving surfaces clean and sparkling with a fresh and fragrant smell. Product is based on a blend of surfactants, biocides, solvents, soaps, fragrance and water-soluble dyes.

Features include:

- Economical dilution rates.
- Disinfects, deodorises and degreases in one.
- Leaves room smelling clean and fresh.
- Removes the most stubborn soils found in washrooms such as soap scum.
- Kills odour producing bacteria eliminating the source of malodours.
- Suitable for use on all surfaces.
- All surfactants used are biodegradable and phosphate free.

PROPERTIES:

Appearance @ 20°C pH (neat) Odour Specific Gravity @ 20°C Flammability

SPECIFICATION:

Bright green, clear, non viscous liquid 8.5 +/- 0.50 Concentrated fresh, floral fragrance 1.00 +/- 0.005 Non-flammable

Order Code: HMWASH-4x5L

DIRECTIONS FOR USE:

- For general cleaning dilute 1:50 warm water. To obtain the various bactericidal kills use at 1:20-1:40 as appropriate (see efficacy data below).
- Spray, mop or wipe onto surface, rinse and leave to dry.
- For heavily soiled areas, the product may be used neat.

STORAGE:

Store in original container and protect from extremes of temperature. Do not store in direct sunlight nor allow the product to freeze. Shelf life (in unopened original container) is a minimum of 18 months.

SAFETY ADVICE:

Under the new GHS Standard this product is not classified. Please refer to section 2.2 of the Safety Data Sheet for more information.

Manufactured to standard of BSEN 1276 testing. PCS No: 100114

PACK SIZES:

4X5L case (48 cases per pallet)

TECHNICAL SPECIFICATION

WASHROOM CLEANER/SANIFRESH

Washroom Cleaner is effective against the following bacteria / Fungi / Algae and yeasts at a dilution rate of 1:40:

BACTERIA

Salmonella typhosa Salmonella paratyphi Salmonella enteritidis Listeria monocytogenes Shigella dysenteride Bacillus subtilis Aerobacter aerogenes Vibrio cholerae Micrococcus pyrogenes Pneumococcus II Streptococcus pyogenes Streptococcus faecalis Streptococcus mutans Streptococcus sanguis Streptococcus lactis Closi Welchii Closi tetani Closi hystolyticum Closi oedamatiens Kleb pneumoniae Candida albicans Porteus vulgaris Desulphovibrio desulphuricans

FUNGI

Asperaillus niger Chaetonium globosum Myrotheecium verucarria Trichoderma viride

ALGAE

Chlorella vulgaris Stigeoclonium sp. Anabaena cylindrica Oscillactoria lenius

YEASTS

Saccharomyces cerevisae Rhodotorula rubra Endomycopsis albicans

Washroom cleaner is resistant to MRSA when used at a concentration 1:14, with a contact time of 5 minutes.

WASHROOM CLEANER/SANIFRESH & BS EN 1276 TEST STANDARD

This British Standard test measures biocidal activity against Escherichia coli, amongst other organisms. The contact time is 5 minutes and the required kill is 5 log10 reduction in organisms. Washroom Cleaner/Sanifresh will pass this test at the standard dilution rate of 1:20.

Washroom Cleaner also passes this test in relation to other test organisms such as Pseudomonas aeruginosa, Staphylococcus aureus, Proteus mirablis, Streptococcus faecium and Saccharomyces cervisiae.
